

Power analysis of original studies

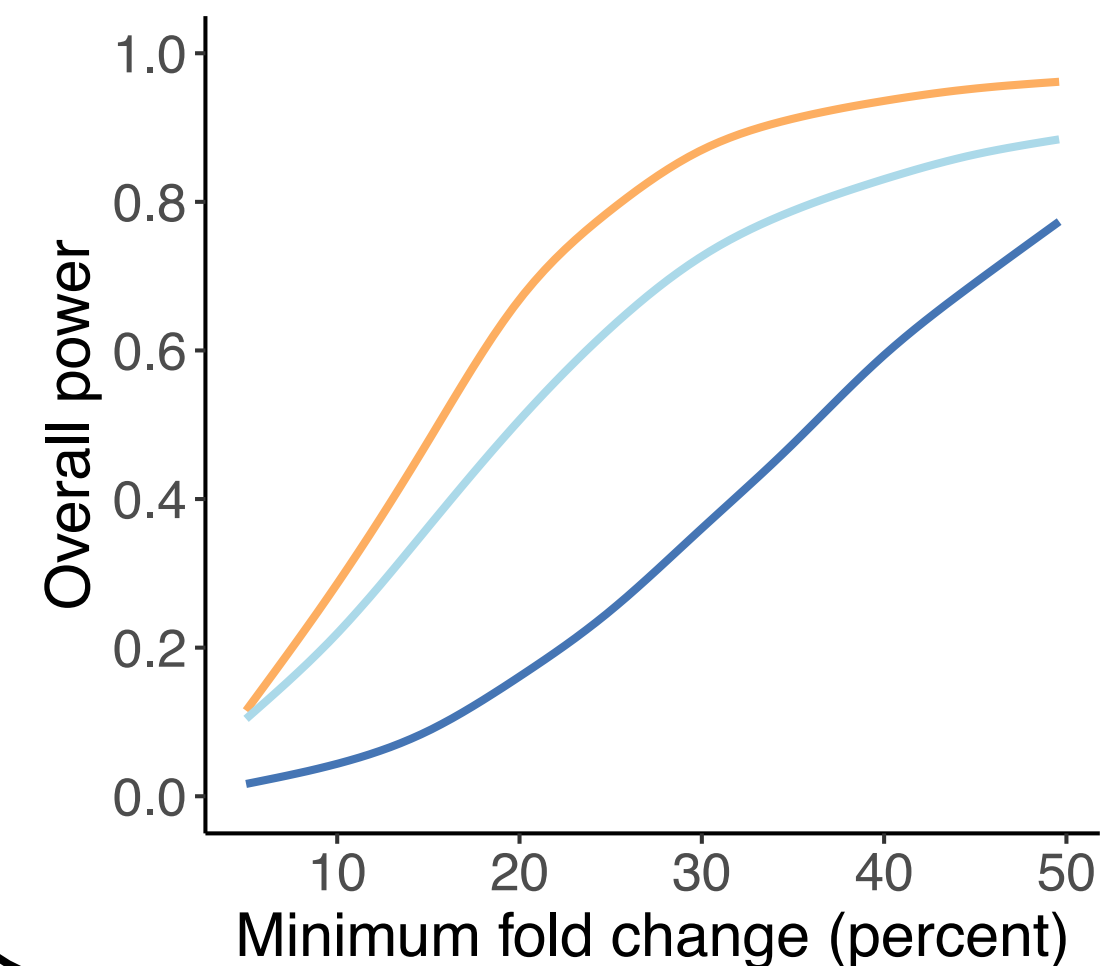

a Original design choices

	Morris	Gasperini	Replogle
Reads/cell	60K	34K	15K
Cells/target	1K	1K	200

b Varying TPM with FC = 25%

c Varying FC with all expressed genes

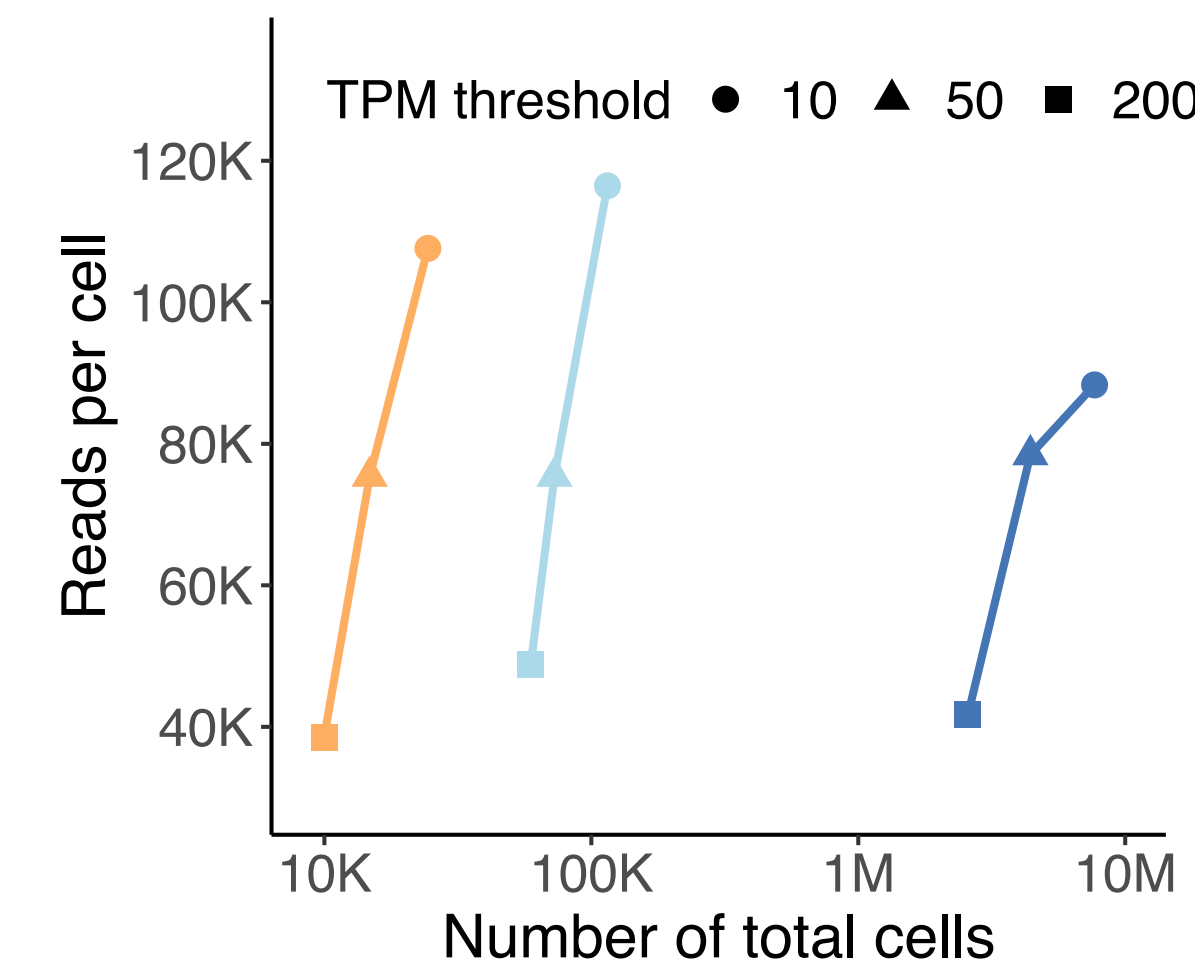

Scale of optimally redesigned studies

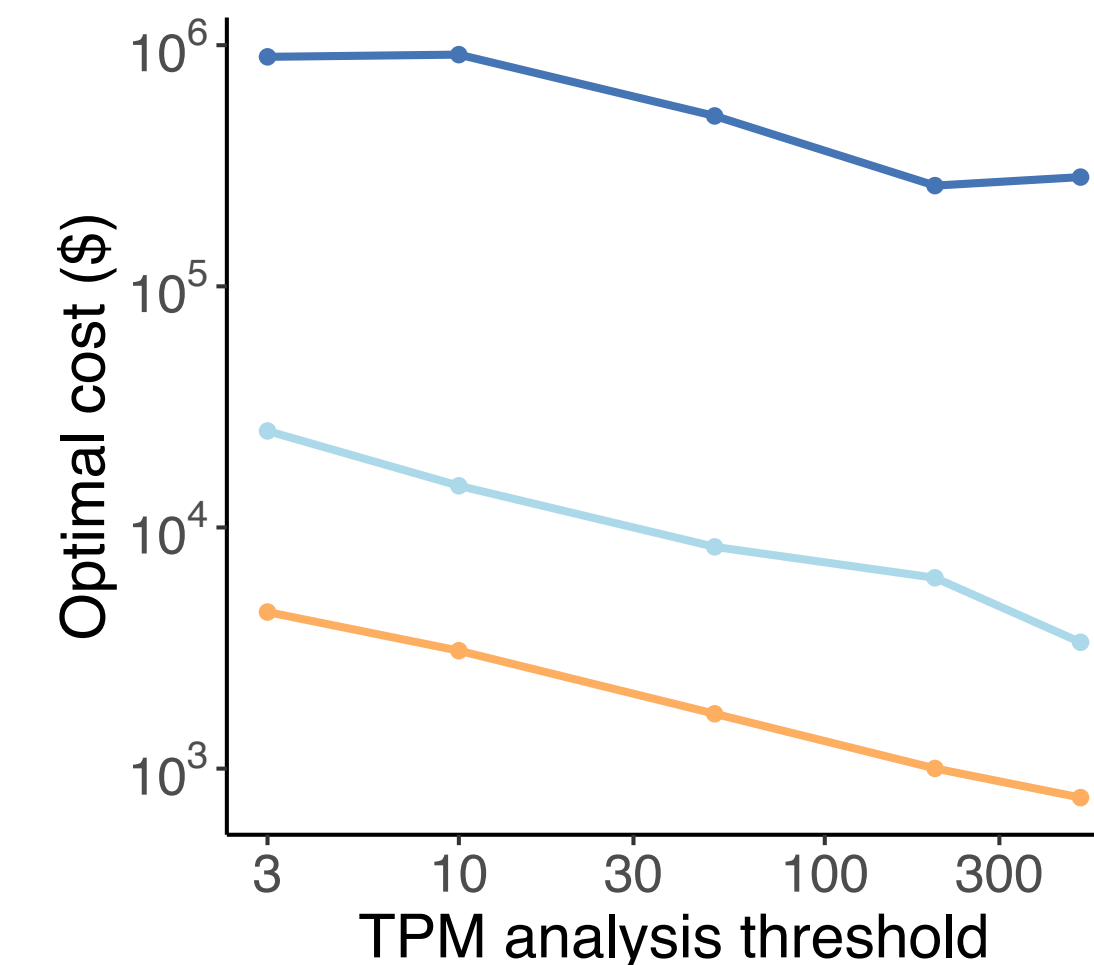

d Original design choices

	Morris	Gasperini	Replogle
#targets	600	6K	10K
MOI	13	28	1

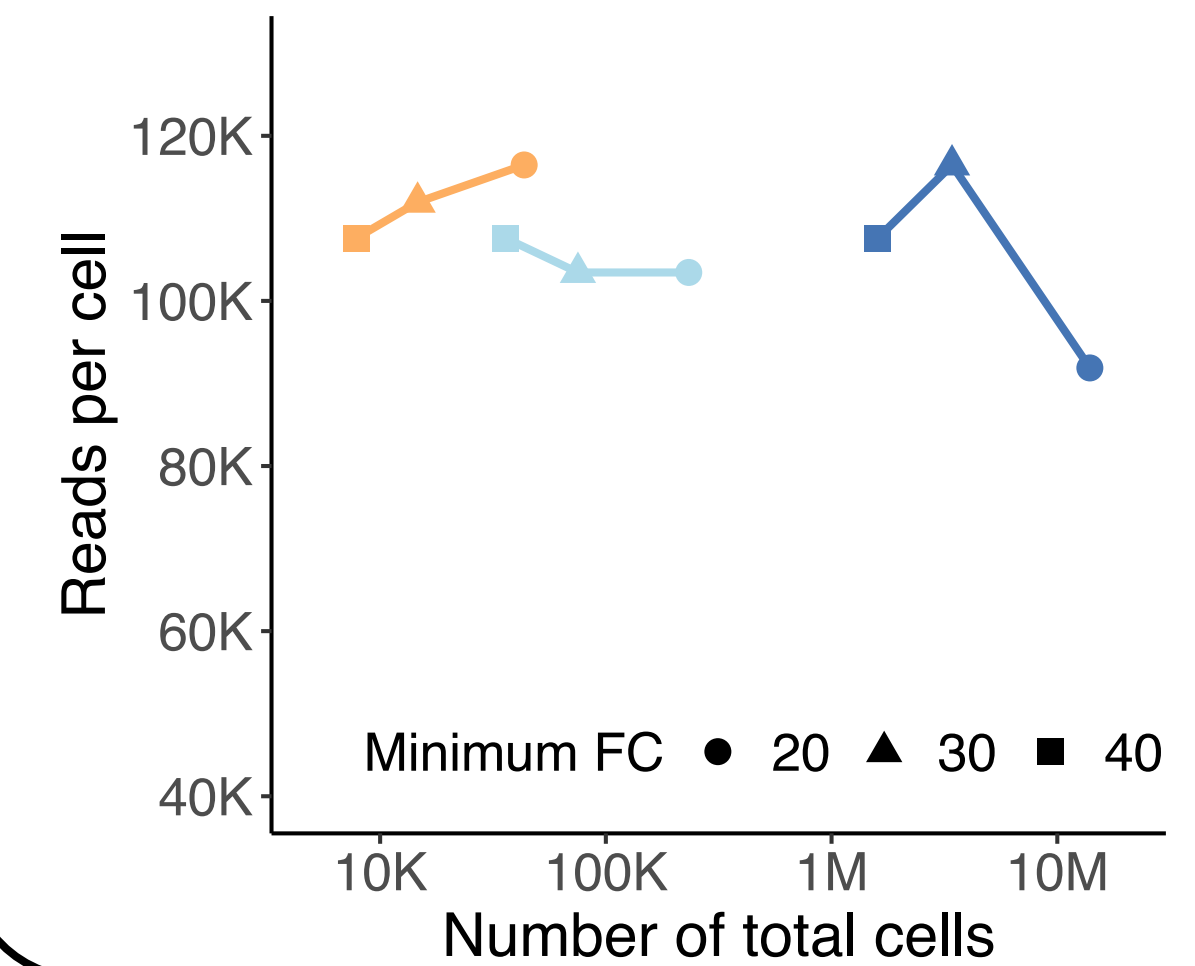

e Optimal (cells, reads) vs. TPM

g Optimal cost vs. TPM threshold

f Optimal (cells, reads) vs. minimum FC

h Optimal cost vs. minimum FC
